

Brochure printing and folding instructions

- Make sure you've chosen the right format (A4 or US letter)
- Set printing to "flip on short end"

- We would recommend printing one test copy to make sure the printer margins are correct and that it will fold properly
- Once it's printed, have the page showing "Our Mission", "Our Work", and "Get Involved" facing you and then fold the right side in (so you see the donations page), and then fold the left side over that (so you see the Tariro logo). This means you should have the Tariro logo on the front, the contact info on the back, and the page about what donations achieve when you turn the front cover.

We've included photos showing the steps below.
